

# RED SILO

*Douglas County, Colorado*

## Telecommunications

In Douglas County, Colorado there is plenty to "talk" about. As you approach this rural location, you see the predictable farmhouse in the country, but the closer you get you realize that this silo has some unique qualities not usually found on a farm.

The dome structure was constructed of 90% Fibergrate and 10% steel. The silo houses 4 carriers with VoiceStream as the dominant owner. The remaining structures and barns house the BTS equipment and switchgear.
